LETTER FROM DIRECTOR TO CO WORKERS

If your God is with you then what else do you need to succeed? The bible says “seek and you shall find it, knock and it shall open” It clearly states you have to do your part before God can perform any miracles. By merely praying for things, you are trying to fool God. I am quoting the Bible because that is the religious book that I am most familiar with but I am sure similar analogies can be found in every other religious book. If we request a glass of water from a waiter in a restaurant, we are pretty sure that we will get it but how sure are we that our wishes will be granted by our loving God! Why is that? How much of faith do we really have?

Believe in yourself, your creator has created you with enough capabilities to win this world. You are in this world every day battling against fear, negativity, ignorance, peer pressure, and all other negative attributes along with it and you still have made it so far but there is a long way for you to go. Know that others with specialized knowledge will join you on your crusade if it is noble. You don't have to know everything, there will always be someone that knows the piece of puzzle that you don't. This is why it is so critical for us to remain as a team. Know that cooperation is the key to success; it is impossible for one person to know everything. Your will is your superpower- there is nothing on Earth that can slow down a determined soul. If your cause is noble then unseen forces will come to your aid. A determined soul with noble cause is not alone in what they want to achieve. If each of us are excellent in what we do and if can put out the best we can then as a whole unit we will be the best. It will be insane for anyone to choose any other facility for their Physical Therapy needs. You must be passionate about making fellow human beings “Pain free” as we are at Healing Touch.

The message to our competitors would be- either play at our level or be prepared to be dominated by Healing Touch. Consumers are very smart, why would they choose anyone else when we are offering “Pain free body guarantee” and “No more medical bills” We are even offering complimentary transportation. There are tons of educational materials on our website, even FREE self treatment books.

It is only a matter of time before people realize all the services we offer. When the consumers become our patient, they are our clients which means they are under our care and protection so we must go out of our way to help the people we take in.

As the director it is my pledge that we will do the absolute very best for our clients.
